

Lab 1 Tableau Installation

COMP7507 Visualization and Visual Analytics

Introduction of Tableau

Tableau ['tæbləʊ] is a company of interactive data visualization for bloggers, journalists, researchers, advocates, professors and students to make their storytelling expressive and insightful. It offers several main products: Tableau Desktop, Tableau Server, Tableau Online, Tableau Reader, Tableau Public, etc.

Download Tableau Desktop

Tableau offers a free student license (Fig.1).

Fig.1 Tableau webpage

Go to <https://www.tableau.com/academic/students>, fill in the forms with your HKU student information to verify your student identity and download the software.

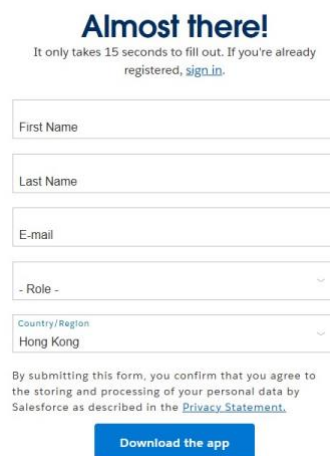

A screenshot of the 'Almost there!' registration form on the Tableau website. The form is titled 'Almost there!' in bold blue font, with a subtext 'It only takes 15 seconds to fill out. If you're already registered, [sign in](#).' Below the title are five input fields: 'First Name', 'Last Name', 'E-mail', '- Role -' (a dropdown menu), and 'Country/Region' (a dropdown menu with 'Hong Kong' selected). At the bottom of the form, there is a small paragraph of text: 'By submitting this form, you confirm that you agree to the storing and processing of your personal data by Salesforce as described in the [Privacy Statement](#).' Below this text is a blue button labeled 'Download the app'.

Fig.2 Download the app

Another Option: Tableau Public

If you don't want to download Tableau Desktop, you can use [Tableau Public](#) (Fig.3). Tableau Public has most of the features that Tableau Desktop has, all works created by Tableau Public must be saved on a public server, and when using Tableau Desktop, you can save your work on your local system.
