

COMP7507: Rubrics for Demo Presentation

	Sophisticated	Competent		Not yet Competent
	5	4	3	2 1
Organization	Walkthrough of visualizations and visual analytics process is clear, logical, and organized. Listener can follow line of reasoning.	Walkthrough of visualizations and visual analytics process is generally clear and well organized. A few minor points may be confusing.		Organization is haphazard; listener can follow walkthrough of visualizations and visual analytics process only with effort. Arguments are not clear.
Delivery	- Level of presentation is appropriate for the audience. - Presentation is a planned conversation, paced for audience understanding. It is not a reading of a paper. Presenter is comfortable in front of the group and can be heard by all. - Presenter(s) adhere strictly to time limits set. - Presenter(s) engage the audience at all times through the skillful use of eye contact, gestures, variation in voice.	- Level of presentation is generally appropriate. - Pacing is sometimes too fast or too slow. Presenter seems slightly uncomfortable at times, and audience occasionally has trouble hearing him/her. - Presenter(s) adhere more or less to the time limits set. - Presenter(s) engage the audience most of the time through the use of eye contact, gestures, variation in voice although one or two of these could be done better in places.		- Aspects of presentation are too elementary or too sophisticated for audience. - Presenter seems uncomfortable and can be heard only if listener is very attentive. Much of the information is read. - Presenter(s) do not adhere to the time limits set. - Presenter(s) seem to make little attempt to engage the audience eye contact, gestures, variation in voice. All are ineffective throughout the presentation.
Use of Communication Aids	Communication aids enhance presentation. - The font on the visuals is readable. - Information is represented and organized to maximize audience comprehension. - Effective use of visuals (e.g., images, illustrations, visualizations) Details are minimized so that main points stand out.	Communication aids contribute to the quality of the presentation. - Font size is mostly readable. - Appropriate information is included. - Appropriate use of visuals (e.g., images, illustrations, visualizations) Some material is not supported by visual aids.		Communication aids are poorly prepared or used inappropriately. - Font size is too small to read. - Too much information is included. - Lack of visuals (e.g., images, illustrations, visualizations) Details or some unimportant information is highlighted, and may confuse the audience.
Content - depth of content - accuracy of content	- Speaker provides accurate and complete explanations of ideas, key concepts and theories, drawing on relevant literature. - Information (names, facts, etc) included in the presentation is consistently accurate.	- For the most part, explanations of ideas, concepts and theories are accurate and complete. - No significant errors are made. Listeners recognize any errors to be the result of nervousness or oversight.		- Explanations of ideas, concepts and/or theories are inaccurate or incomplete. - Enough errors are made to distract a knowledgeable listener. Some information is accurate but the listener must determine what information is reliable.
Mechanics	Sentences are complete and grammatical. They flow together easily. Words are well chosen; they express the intended meaning precisely.	Sentences are complete and grammatical for the most part. They flow together easily. With some exceptions, words are well chosen and precise.		Listeners can follow presentation, but they are distracted by some grammatical errors and use of slang. Some sentences are halting, incomplete, or vocabulary is limited or inappropriate.
Responsiveness to Audience - verbal interaction - body language	- Consistently clarifies, restates, and responds to questions. Summarizes when needed. - Body language reflects comfort interacting with audience	- Generally responsive to audience questions and needs. Misses some opportunities for interaction. - Body language reflects some discomfort interacting with audience.		- Responds to questions inadequately. - Body language reveals a reluctance to interact with audience.

[Rubrics adapted from grade descriptors for presentations used for common core courses (HKU) & rubric for formal oral communication (Eberly Center for Teaching Excellence, Carnegie Mellon University)]
